

NEW GREENING

Integrated Energy Platform

Powering industry · Creating value · Accelerating the energy transition

Boiler Plate

New Greening is an integrated energy platform focused on accelerating the decarbonisation of industry through sustainable, efficient, and high-value energy solutions.

Through a vertically integrated business model, the company develops, builds, commercialises, and optimises solutions that combine renewable generation, industrial self-consumption, energy trading, energy flexibility, engineering and construction (EPC), biomethane, and circular economy initiatives, delivering a differentiated value proposition for industrial customers.

With operations in Spain, Italy, the United States, and Mexico, Greening drives growth through a business model based on recurring revenues, financial discipline, operational excellence, and long-term value creation.

Its 2026–2030 Strategic Plan positions the company as one of the key players in the consolidation of the energy sector, combining organic growth, selective acquisitions, and the development of specialised platforms such as **GreenSol, TWiNE, and Relive**.

Greening has been listed on BME Growth since 2023 (BME: GGR).

Purpose

To accelerate the transition towards a more efficient, competitive, and circular energy model by developing integrated solutions that help industry reduce its carbon footprint, optimise energy consumption, and generate a positive impact for people, the economy, and the planet.

Mission

We drive the decarbonization of industry through an integrated energy platform that combines renewable generation, industrial self-consumption, energy trading, energy flexibility, engineering and construction (EPC), biomethane, and circular economy solutions.

Our commitment is to deliver innovative, efficient, and sustainable energy solutions that create value for our customers, shareholders, and society while enabling a more competitive, resilient, and responsible energy transition.

Vision

To become one of the leading integrated energy platforms, driving the transformation of the energy sector through a business model built on innovation, industrial excellence, financial discipline, and sustainable growth.

We aspire to play a leading role in the consolidation of the energy sector by combining industrial capabilities, technology, and integrated energy solutions that address the challenges of electrification, decarbonisation, and the circular economy.

Values

At Greening, we are a different kind of company, driven by a distinctive personality that inspires us to tackle every challenge with ambition, innovation, and excellence.

Our culture is built around **The 3Bs**, three principles that define the way we work and how we are shaping the future of energy.

Be Brave

We are bold, entrepreneurial, and determined. We challenge the status quo, foster innovation, and take on complex projects with confidence to accelerate the energy transition while creating a positive impact for our customers and society.

Be Beyond

We think beyond technologies, markets, and traditional business models. As an integrated energy platform, we deliver solutions across the entire energy value chain, combining renewable generation, industrial self-consumption, energy trading, energy flexibility, biomethane, circular economy, and engineering capabilities to offer a unique value proposition to our customers.

Be Brilliant

We pursue excellence in everything we do. We work with integrity, commitment, and a strong customer focus, fostering a culture driven by innovation, talent, collaboration, and financial discipline to create sustainable long-term value.
